

Over explains brevity and haste. I think Dottie was pulling legs. I've not been shot at. ..
You never find a less dependable source than Computers. Believe not a word, especially not
for school work. ...The print of the sketch/picture is what the hell kind of investigation
was it. And who cooked it up. ...Weberman and Garfield are crazy at best. No sense to that
at all and none to any use of the pictures of which I know. Always misrepresented. ...
Think you'd do well to include Lisa. You've undertaken too big a job and you don't
display having obtained a capability to discriminate between the real and the unreal. Your
prof is going to consider you crazy if you do not pull in on some of this....The prices
went up a year ago. Appreciate your sending the \$5.05 difference. New list enclosed....
With the restriction of what I can do I have to eliminate most correspondence or I'd
be doing nothing else. Thanks and good luck, Harold Weinberg 2/21/76

Dinner Hour

In struggle for truth,

you've spent over the years trying to find
the truth; my whole family is very
grateful for all you've done for all of
us in this country.
